

The ViLX-ODP-66 Weatherproof Overdoor Indicator is fully compatible with the Lexicomm EVC range of equipment and the standalone Assist Call range.

- Robust IP66 housing
- BS8300 "Acknowledge" feature
- High volume sounder
- Blue indication
- Surface mounting

Overview

The ViLX-ODP-66 Weatherproof Overdoor Indicator is ideal where external accessible sanitary accommodation is provided. Examples are Visitor Attractions, Stately Homes, Sports Grounds, Car Parks, Transport Hubs and Municipal WC Blocks.

Operation

When a call is made, the overdoor unit emits a two-tone sound with blue flashing indicators. When the call is acknowledged, the indicators illuminate steadily and the tone double beeps every 15 seconds to reassure the caller that help is on the way.

The indicator must be used with the Vox Ignis Assist Call range only; it is not compatible with other manufacturers' equipment.

Mounting Information

The indicator should be mounted above the WC door to indicate the origin of the alarm.

There are 5x 20 mm cable entries provided at the top, bottom, and sides. Cable entry via rear cut-out is provided also.

See installation instructions on our website for further information.

Wiring Information

For simplicity, all wiring is a standard two core cable, the wiring order of the devices is not fixed and therefore can be wired in any order to give total flexibility.

Technical Specification

DETAILS	ViLX-ODP-66
PHYSICAL	
Height	103 mm
Width	103 mm
Depth	65 mm
Weight	205 g
Material	"ASA" Plastic
